**Subject:** Microsoft Antitrust Settlement

Dear Sirs:

In my opinion, the settlement with Microsoft is totally inadequate. In my opinion, if Microsoft's contention is that their software has gone through such great development, it seems that they should be willing to either make past releases available for free or for a minimal cost through a download either in SOURCE or compiled form. The current settlement is of such little cost to them, I am sure they are having a party. The cost of the PC's they are suggesting giving to the schools run for around \$25.00 in lot buys from corporations such as Boeing. Thank you for your time.
